

DryPHONE Remote Monitoring

ON-THE-JOB DEVICE

The **Phoenix DryPHONE**, while not a conventional phone, has been specifically designed to be left on a job for remote monitoring and instant notifications. For more information on the DryLINK® App and DryPHONE, visit Usephoenix.com/phoenix-drylink-mobile-app/.

DryPHONE Remote Monitoring (Optional)

BENEFITS

- Enter daily readings remotely
- Rearrange daily visits based on actual conditions
- Select equipment to monitor
- Select users to receive alerts
- Receive real-time alerts of your choice

JOB STATUS ALERTS

- Chamber temperature is out of range
- Chamber RH is out of range
- Chamber GPP is not decreasing

EQUIPMENT ALERTS

- Equipment has been turned off
- Last known location of unit
- Battery replacement needed
- Filter needs to be changed

JOB MANAGEMENT ALERTS

- Job has been started
