New Verisk and Phoenix Restoration Equipment Integration Enhances Restoration Job Reporting

Seamless integration between Restoration Manager and DryLINK
instantly syncs jobs and equipment data

Madison, Wis. and Jersey City, NJ-- Phoenix Restoration Equipment, a top provider of line equipment, and Verisk, a leading global provider of predictive analytics and decision-support solutions, today announced a new integration to help streamline and enhance restoration job management and reporting.

Phoenix's equipment management and productivity solution, DryLINK Ecosystem, now integrates with Restoration Manager™, a job management solution provided by Xactware, a Verisk business. This enhanced functionality enables restoration professionals to open and synchronize jobs and equipment between Restoration Manager and DryLINK and manage jobs in DryLINK while synchronizing psychometric data to Restoration Manager.

"The DryLINK integration allows users of Restoration Manager to reap the unique time and money saving benefits of DryLINK while using the Restoration Manager platform," said Erin Hynum, Product Manager, Phoenix Restoration Equipment.

Restoration Manager is a job management application that helps restoration professionals coordinate tasks and streamline work. The DryLINK Ecosystem is a Bluetooth-enabled equipment management and productivity solution, including dehumidifiers, air movers and sensors. The Phoenix DryLINK-enabled system collects and logs moisture readings as frequently as every 15 minutes, synchronizing them to a web- and phone-based application. In addition, Phoenix's DryPHONE can work with DryLINK-enabled equipment to remotely-monitor the job site to take readings and provide alerts if equipment is shut off.

"We are proud to offer this new integration as part of our ecosystem of open and extendable solutions," Xactware President Mike Fulton said. "This enhanced functionality can help restoration professionals work faster and more effectively than ever before."

To learn more about this new integration, please see DryLINK's recent presentation at Verisk Elevate 2021.

About Phoenix Restoration Equipment

Phoenix is the leading manufacturer of world-class extraction, dehumidification, air scrubbing and evaporative drying equipment for water restoration professionals. Phoenix is a brand of Therma-Stor LLC, a company dedicated to innovation in the indoor air quality and water damage restoration industries.
